

## **FREDERIC VERON**

Frederic Veron has over 30 years of extensive experience in the financial services technology industry. In June 2024, he was named chief information officer and head of the Technology Group. He will join the New York Fed in June 2024.

Most recently, Veron was a financial services consulting principal within the Technology Strategy & Transformation Practice at Ernst & Young LLP. In this role, he was responsible for delivering major consulting engagements with global financial institutions in areas such as technology strategy, resiliency, emerging technologies, delivery transformation, and IT operations.

Prior to Ernst & Young, Veron served as Managing Director and Global Head of IT Operations at Deutsche Bank. There, he was responsible for all enterprise IT operations and IT risks and controls on a global basis. He also held key technology leadership roles at Fannie Mae, including Chief Technology Architect, Chief Technology Officer, and ultimately Enterprise CIO.

Additionally, Veron has held various technology-focused leadership positions at major consulting firms, including KPMG LLP and BearingPoint, Inc.

Veron earned his Master of Science degree in computer systems networking and telecommunications from Télécom Paris, Institut Polytechnique de Paris, in France.
